Welcome

to BBP Marketing Ltd

We are a privately owned company based in Mirfield, West Yorkshire.

Originally formed in 1882 you may know us as BBP. We have been operating on the same manufacturing site since 1917.

BBP are recognised as a leading UK manufacturer of reusable drinkware and catering products. We have a large range of styles & sizes and continually expand our range in order to fulfil our customer's requirements. All our production machinery are of the latest generation, computer controlled and some fully electric as these machines are proven to be more cost effective and efficient.

We operate on a 24 hour continual production basis and supply to the catering distribution network from stock on either a 3 day or next day service.

We also now export to over 25 countries.

Our manufacturing site alongside the Calder and Hebble Navigation in Mirfield.

A leading UK manufacturer of virtually unbreakable drinkware & catering products

ELITE POLYCARBONATE

The virtually unbreakable Elite Polycarbonate range is our flagship product line. Made from food grade material, it is 100% reusable, 100% environmentally friendly, and 100% recyclable at the end of its life.

From 25ml shots to 2 pint pots, the Elite Drinkware range has it all.

COLOUR OPTIONS

COLOUR OPTIONS

Whilst BBP stocks a large range of different colour options, we can match almost any new colour requested by customers. If you can think of it, the chances are we can make it.

COLOUR OPTIONS

Gold and Silver Elite Champagne Flutes - one of our newer releases.

The current red range with part of the black and white range in the background.

Part of our Econ Neon range, glowing under UV light.

Printed Drinkware

Our decorative coloured logos are performed via screen printing which works best when printing onto Polycarbonate and Polystyrene.

- Pad & Rotary Screen prints
- 1-5 colours (full colour)
- Size of print depends on the size of the glass.
- Mock up images available on request
- No set minimum quantity
- Please email us for a quotation info@bb-plastics.co.uk

Lasered Drinkware

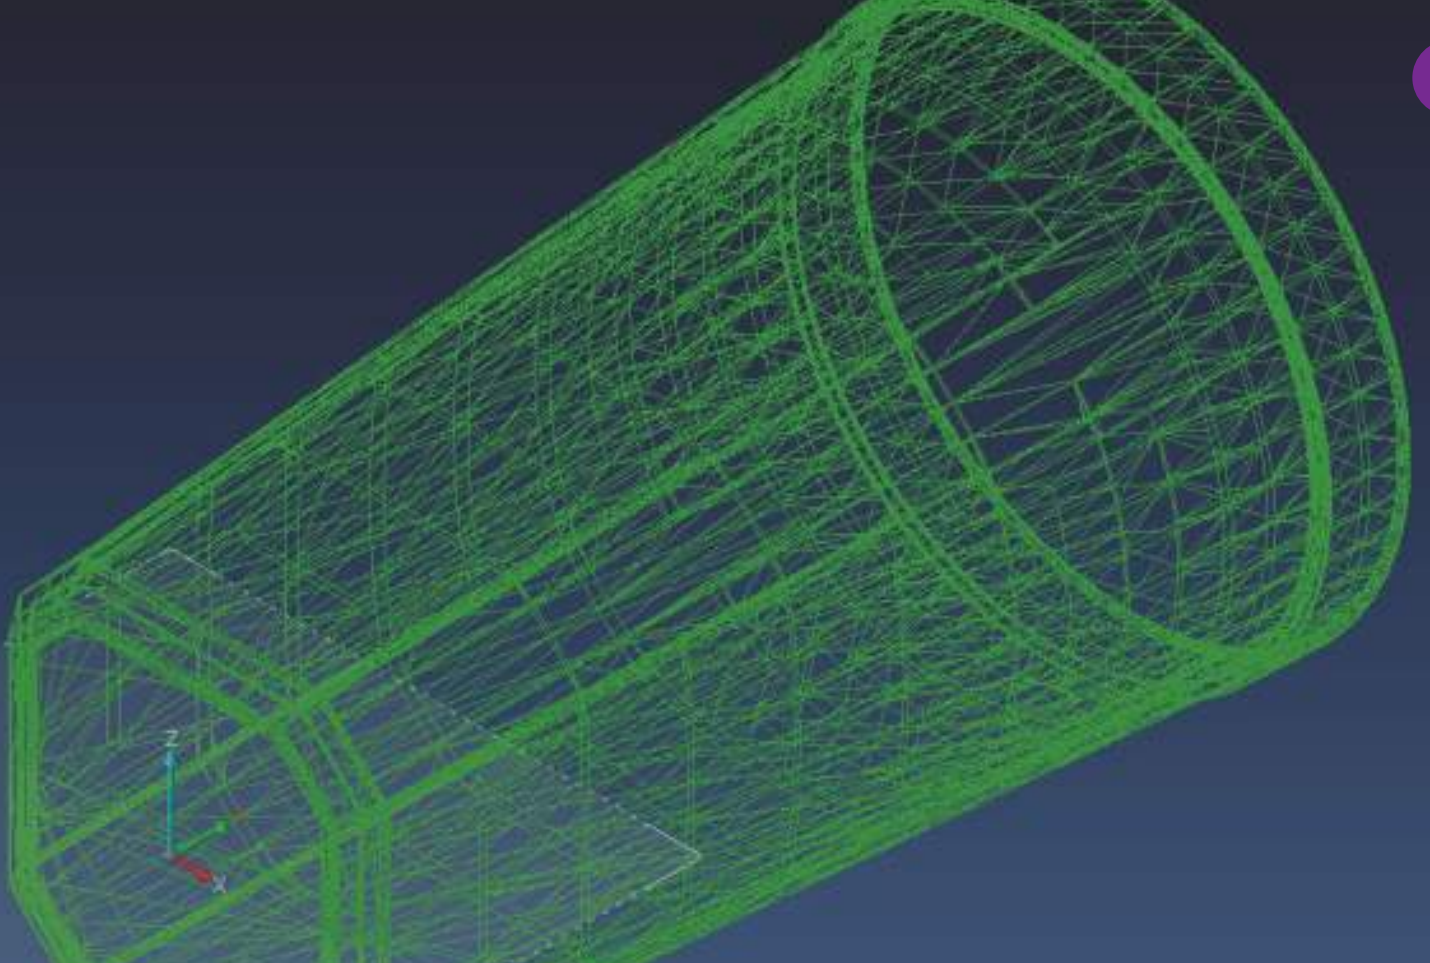

As well as undertaking the usual CE marking and Nucleation, our lasers are capable of far more intricate applications.

Most artwork or logos supplied to us can be run through the laser software and converted into a compatible image. The lasers can only etch in dark grey but it's more cost effective than screen printing and has a quicker turnaround time. Laser application not available on Econ range.

Designed for NHS

Bespoke Design

BBP can develop bespoke products for you or your customer from unique designed drinking/ serving vessels to personalised printing and decorating of our existing ranges.

We will take your concept from initial design to final production with full CAD & 3D model facilities and the option of SLA models for you and your customer to handle prior to full production.

CE Marking

Our CE marked glasses are suitable for use in licensed establishments, such as bars, pubs, restaurants, hotels and cafes where it is required by law to ensure you are selling the correctly measured amount of certain types of alcohol.

The CE measurement mark can be to the brim or a line marked on the vessel. It was previously known as government stamped (GS) or crown stamped glassware prior to 2006.

Glasses used as brim measures can have the CE marking on either the side or the base of the glass.

You need CE marked glasses when selling alcohol if using the glass to measure the amount to serve.

You do not need CE marked glasses if you are serving alcohol free of charge, using the products at home, or using an alternative measurement unit that has been legally verified.

Look out for the CE Marked logo throughout the catalogue which indicates what options are available as standard.

Nucleated

An additional process in polycarbonate products, maintaining carbonation to keep the bubbles fizzing and drinks fresh.

Look out for the Nucleated logo throughout the catalogue

Materials

We manufacture in two materials: Both materials look very similar.

Virtually unbreakable polycarbonate –
we call this our Elite range

Elite Range

Our Elite range of products is manufactured from polycarbonate material. This material is Food & Drug approved and conforms to the Materials and articles in Contact with Food (England) Regulations 2012 including (EU) No 10/2011. It has superior strength over other plastic materials and therefore the products are virtually unbreakable. We have tested the products in glass-washers with a standard solution in excess of 1000 cycles with no noticeable visual detractor.

Rigid reusable crystal polystyrene –
we call this our Econ range

Econ Range

Our Econ range of products is manufactured from crystal polystyrene material. This material is Food & Drug approved and conforms to the Materials and articles in Contact with Food (England) Regulations 2012 including (EU) No 10/2011. It has good clarity but may break if dropped onto a hard surface or stood on. We have tested the products in glass-washers with a standard solution in excess of 100 cycles with no noticeable visual detractor.

After Care

Your glasswash manufacturer will be able to advise of which solution and cycle time best suits your machine. The water type in your area also needs to be taken into consideration. You can handwash using any mild solution and dry with a soft cloth, please note using a harsh abrasive or rough cloth may cause damage to the appearance.

REUSABLE, NOT DISPOSABLE.

Both our Econ Polystyrene & Elite Polycarbonate ranges are 100% reusable. When they eventually come to the end of their very long life, they are ground into pellets and remanufactured into further goods within other industries. This makes all of our products 100% recyclable.

Polycarbonate is virtually unbreakable so tends to last for years. It doesn't smash when dropped, unlike glass. This is great from a health and safety point of view, a product longevity point of view and a green point of view.
